

Hello All,

Just a very short note to end this Friday on...

Given the number of students who are in quarantine in Fort Mill and Rock Hill School Districts, there will invariably be parents among your students who are impacted by their kids being in quarantine. Your students who have kids in quarantine may have difficulty attending class in person. Please extend what flexibility you can to these students, just as you would if they themselves were in quarantine.

If your students who are parents have questions about their options, please direct them to the [Dean of Students Office](#), for support with [student absence verification](#).

My own 6th-grader is in quarantine due to exposure. I appreciate the flexibility that I have been able to access, and I know our students who are parents will appreciate it as well.

And of course, please point out that students should not bring their quarantined children to campus. We want to ensure our students who are parents make steady progress in their courses without compromising our campus safety expectations.

Many thanks and have a great weekend.

Adrienne
