

## WHAT ENVIRONMENTAL SCIENCES AND STUDIES STUDENTS ARE DOING AND SAYING

### EXAMPLES OF WHERE OUR GRADUATES ARE LANDING

	MAJOR*	When they graduated	What they are doing as of August 2019
Dalton	ENST	2018	Environmental Health Manager, SC Dept. of Health and Environmental Control
Sarah	ENSC	2018	Park Ranger, Denver, CO
Max	ENST	2017	Graduate student, environmental management and urban planning, Hochschule RheinMain
Anna	ENST	2017	Service Member, Food Corps, Charlotte, NC
Anne	ENSC	2017	Environmental Health Manager (Air Quality Data Integration), SC Dept. of Health and Environmental Control
Tianee	ENSC	2017	Environmental Scientist, TN Dept. of Environment and Conservation
Veronica	ENST	2016	Environmental Scientist, Jacobs, Charlotte, NC
Shelby	ENST	2016	Water Quality Coordinator, Asheville (NC) GreenWorks
Tanner	ENST	2016	Health and Safety Specialist, Clemson University

\*ENST = Environmental Studies; ENSC = Environmental Sciences

### EXAMPLES OF WHAT OUR STUDENTS ARE SAYING

"I have really enjoyed the interdisciplinary and highly diverse nature of the coursework that the program features. This aspect has allowed me to "weave" multiple disciplines such as anthropology, religion, philosophy, and science, into my chosen field of study. Also, the instructors who work together to create this program are top-notch and are willing to work with students to make known to them the wide array of career opportunities associated with the environmental field."

"I enjoy the professors and the wide range of classes. I have formed so many important relationships with some of my professors. They are incredibly passionate about their specific study which makes learning from them much easier."

"The Winthrop Environmental Program provided me with a solid foundation of environmental knowledge and skills, while the university offers a great variety of classes allowing you to tailor your degree to your specific preference and interests."

"The best thing about the degree was that I was able to focus on what I wanted. It is a wide enough major that I could find something to fit who I was. It was also focused enough that I was able to find a job easily. The environmental program was well organized; it was very easy to follow and figure out what I needed to finish my degree. I enjoyed my classes and was able to learn a lot and use what I learned in the real world. In my career now, I still refer to my first few semesters at Winthrop, from the first environmental class all the way to my senior seminar."
