

Advising Guidelines for Transfer Students

Transfer by the completion of the freshmen year is recommended for timely completion of the program. All students must complete five full clinical rotations throughout their time in the Athletic Training Program. After fall 2020, transfer into the Bachelor of Science in Athletic Training will not be possible.

The semester and year in which a course is taken varies for transfer students. The following sequence provides additional scheduling and sequencing guidelines to aid advisors and students in planning.
