

Winthrop University | College of Visual and Performing Arts Artificial Intelligence (AI) Policy

ChatGPT and Artificial Intelligence (AI) Policy The field of Learning Design and Technology embraces the responsible use of Artificial Intelligence (AI) to help us improve human learning and performance. There are AI tools to create custom images and background music for multimedia projects. There are also AI tools that can create written responses to specific questions. As AI improves it may help us do our jobs better and more efficiently. In this class it is required that you disclose the use of AI tools in the production of materials and any class assignments. In this class, all written course requirements including but not limited to discussion board posts, test questions, papers, and projects are to be written by you. The use of any AI tools in the production of written materials in this class will be considered an issue of Academic Dishonesty. The exception is speech to text software which, as we know, is AI. You can voice type your materials, but the ideas must be your own.
