

Guidelines for Completing IACUC001D
(Schedule D: Non-Surgical Injections, Anesthesia or Analgesia)

Revised 08/02/2018

This schedule is to be completed for all animal studies in which the animals will be subjected to non-surgical injections, anesthesia, or analgesia.

All questions must be answered. If some questions are not applicable, please answer NA. After completing the form, print one copy and sign. Submit a PDF with signature to Michele Smith, Office of Grants and Sponsored Research Development via email (smithmr@winthrop.edu).

Question D1:

- Indicate the scientific and common name of the species used in the study.
- Identify all anesthetic/analgesic agents that will be administered before, during and after the procedure. For each, indicate the expected dose and how the drug will be administered (oral, intravenous, subcutaneous or intramuscular.)
- Describe the non-surgical procedure and justify the use of anesthetic/analgesic.

Question D2:

- Identify all other agents (saline, etc.) that will be injected during the study. For each, indicate the expected dose, number of injections and how the agent will be administered (intravenous, subcutaneous or intramuscular.).
- Justify the use of the injections in the study.
