# Student Success Partners
Using AI to Analyze Data

Key Definitions:

- *Artificial Intelligence (AI)* – A broad field of computer science that aims to simulate human intelligence and behavior.

- *Machine learning (ML)* – A subset of AI that involves training algorithms to recognize patterns and make predictions based on data.

- *Large Language Models (LLMs)* – A subset of generative AI specifically designed to generate text (ex., ChatGPT).

STUDENT SUCCESS PARTNERS WEBSITE: www.winthrop.edu/ie/ssp

NEXT SESSION: *Tuesday, November 11th*, at 2:00 pm – 3:15 pm in DiGs 114

Table Activity Questions – Please be prepared to share out.

What insights did your AI tool generate?

What did you find useful about the platform that you used?

Did you experience any issues?

What surprised you?
