Create Adaptive Release Membership Criteria

Overview

This tutorial will explain how to create Adaptive Release Membership Criteria. The Adaptive Release feature allows you to hide course content until various criteria are met. One type of criteria you can set is Membership Criteria, which will display content for specific learners or groups. It is useful for differentiating instruction or dividing content among students.

Want to create different Adaptive Release criteria? Click the appropriate link for instructions:

✓ Date Criteria
✓ Grade Criteria
✓ Review Status Criteria

Quick Steps

Navigate to Item > Item Options > Adaptive Release: Advanced > Create Rule > Submit > Create Criteria > Membership > Course Users OR Course Groups > Submit

Step 1

Navigate to the activity. Open the Item Options menu [1] by clicking on the Item Options arrow that follows the activity's title, and then select “Adaptive Release: Advanced” [2].
Step 2

Step 3

On the Add Rule page, click the Submit button. Optionally, use the Rule Name field to name this Adaptive Release Criteria.

Step 4

On the Manage Criteria page, hover over Create Criteria [4] on the Action Bar, and then select “Membership” [5].
Step 5

On the Membership page, click the Browse button [6] in the Course Users section.

Step 7

Click the Submit button in the Course Membership window.
Step 8

You can also create Adaptive Release Rules for groups from the Course Groups section.

The *Items to Select* area will list each Course Group you have created for your course. Click on a group and use the right-facing arrow to move that group to the *Selected Items* area.

If you make a mistake, you can click on a group in the *Selected Items* area and use the left-facing arrow to remove the group from the list.

Step 9

Click the *Submit* button.

**Note**

To edit, delete, or copy an Adaptive Release Rule, repeat this process starting with Step 2.
