

Create a Blank Page

Overview

This tutorial will show you how to **Create a Blank Page** in a Content Area or Learning Module. Blank Pages are like Items in that you can add text, images, videos, and files to them, and they are useful for creating website-like pages of personalized content in your Blackboard course.

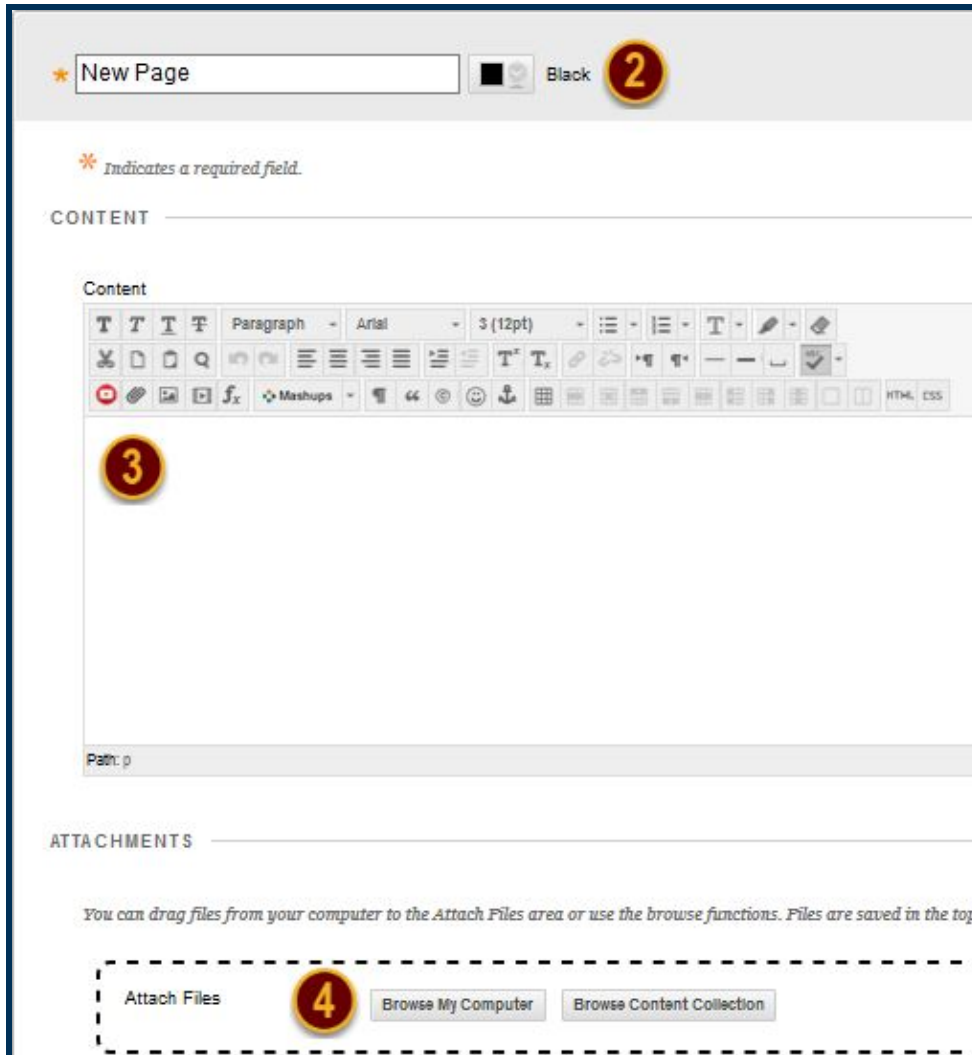

Step 1

Navigate to a Content Area or Learning Module, hover over *Build Content* on the Action Bar, and select "Blank Page" [1].

Step 2

Title the Blank Page [2] and create or insert the new page's content using the Content editor (i.e text, images, videos) [3]. Optionally, attach a file to the page in the Attachments section [4].

The screenshot shows a web interface for creating a new page. At the top, there is a text input field labeled "New Page" with an asterisk indicating it is required, and a color selection dropdown set to "Black". A yellow circle with the number "2" is overlaid on the "Black" dropdown. Below this is a note: "* Indicates a required field." The main section is titled "CONTENT" and contains a rich text editor toolbar with various icons for text formatting, alignment, and insertion. A yellow circle with the number "3" is overlaid on the top-left corner of the content editor area. Below the content editor is a "Path:" field. The bottom section is titled "ATTACHMENTS" and contains a dashed box labeled "Attach Files" with a yellow circle with the number "4" overlaid on it. To the right of the dashed box are two buttons: "Browse My Computer" and "Browse Content Collection".

Step 3

Click the *Submit* button to add the new page to the Content Area or Learning Module.
