Overview

This tutorial will explain how to Make your Course Available.

Quick Steps

My Courses > Course Homepage > Course to Course Menu > Make Course Available

Step 1

Log in to Blackboard. From the Blackboard Homepage, select the course you want to make available from the My Courses module [1].

Step 2

If you do not see a My Courses module, click on the Courses tab [2] in the Portal Menu. Then, select the course you want to make available from the Course List module [3].
Step 3

From the Course homepage, click the Make Available icon [4] on the Course to Course Navigation menu. You will find it after the Student Preview icon and before the Edit Mode switch (it's an image of a lock).

Step 4

The Make Available icon will be replaced by the Make Unavailable icon [5] and your course will be available to student users.
