I. Approval of the Minutes for the Meeting of September 15, 2015 (pending electronic approval) (see attached)

II. Remarks from the Chair (Dave Pretty)

III. Remarks from the Executive Vice President and Provost (Debra Boyd)

IV. Committee Reports
   A. CUC (Will Thacker) (see attached)
   B. General Education (Lisa Harris) (see attached)

V. Remarks from Council of Student Leaders Chair (Ray McKetty)

VI. Old Business

VII. New Business
   A. Reports on the General Education Working Group on the Writing in General Education Courses Requirement and the Honor Code and Pledge Subcommittee (Dr. Alice Burmeister)
   B. Policy for Accelerated Graduate Programs (Combined and “4 + 1”) Proposal (Dr. Jack DeRochi and Dr. Jennie Rakestraw)

VIII. Announcements

IX. Adjournment
I. Approval of the Minutes for the Meeting of April 17, 2015—unanimously approved

II. Remarks from the Chair……………………………………………………..Dave Pretty

Dr. Pretty welcomed new members and asked everyone to introduce themselves. He announced that there will be two working groups for general education. Criteria are being re-vetted with regards to writing and social studies. The academic integrity group will be heard from later in the meeting. He also stated that the Repeat Exemption working group will report at a later time as they have not met again (since last spring).

III. Remarks from the Executive Vice President and Provost.......Debra Boyd

Dr. Boyd thanked everyone for serving. It is important because the Council is folks who look at issues related to academic programs. A number of things are going on. Her job has changed which means she has an opportunity to collaborate with other areas of the institution. She feels this reinforces the importance of academics. She has four divisions that she will be paying attention to and that will be good for our students. She thinks we'll have more collaborative work groups. She is asking folks to
serve on the Gen Ed core committee. She will let us know when the group is together. The staff in her office are getting different assignments. There will be a report from the competitive compensation committee soon. She reminded everyone that we made a decision not to do something quick and dirty. It needs to be a process that goes on indefinitely. The goal is to make sure we understand this and this will be a multi-step process. We do have a little bit of money in the budget for compensation this year. It's important to get this line in the budget. The people working on this are being deliberative and thorough.

Dr. Boyd announced that the president has put together working groups for strategic planning. His sense was we don't need to reinvent the wheel. Each of these groups has a variety of people who aren't necessarily on other standing committees. She assured members they will have an opportunity along the way, just not at the beginning of the process. She asked everyone to encourage their colleagues not to fret that they are not on these working groups.

**IV. Committee Reports**

**A. CUC**

The following program change Items (Degree) was approved by Academic Council:

<table>
<thead>
<tr>
<th>Degree</th>
<th>Major</th>
<th>Conc.</th>
<th>Department</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA</td>
<td>PSYC</td>
<td></td>
<td>Psychology</td>
<td>MODIFY PROGRAM: Allow a maximum of 3 semester hours for PSYC 471 and/or 472 toward the major and up to 6 semester hours of PSYC 471 and/or PSYC 472 towards the BA</td>
</tr>
</tbody>
</table>

Dr. Meeler asked how this change was different. Dr. Kedrowski explained that currently, only three hours can count in the degree. This will allow another three hours that can be applied toward the degree.

**B. General Education**

The following courses were approved by Academic Council as new General Education Courses:

**Courses: First Certify**

Global:
- HIST 549
- GEOG 303

Historical:
- HIST 549

Humanities & Arts:
- VPAS 115

Technology:
- GEOG 320
Courses which were re-certified by the Gen Ed Committee:

**Constitution:**
EDUC 312/ HIST 312

**Historical:**
EDUC 312/ HIST 312

**Humanities & Arts:**
EDUC 312/ HIST 312

**Global:**
EDUC 315
GEOG 306

**Social Science:**
EDUC 315

V. Remarks from Council of Student Leaders Chair…………………..Ray McKetty
Ray introduced himself and stated he was excited to be here. He said it was cool to see the dedication the professors have for students.

VI. Old Business

**A. Report of General Education Working Group on the Technology Requirement**

**Note:** What follows is the version of the General Education Technology Requirement criteria as revised by the Technology Requirement Criteria Working Group in 2014-15. The descriptions of the proposed criteria presented here were edited for clarity and consistency by Janice Chism, Chair Academic Council, 2014-15, and Laura Glasscock, Chair General Education, 2014-15. These edits were submitted to the Working Group in April 2015 and accepted by that group as being in accord with the group’s intentions. J.C. 9/10/15

The General Education Technology Requirement Criteria
There are 6 criteria involved in determining if a class fulfills the technology requirement for general education at Winthrop University. A class meeting the technology requirement must have technology as its primary educational focus and must include digital citizenship. The technology focus may be discipline specific. A class must meet a minimum of 2 of the 4 remaining requirements to meet the general education curriculum requirements.

The class must:
1. have technology as its primary educational focus.

2. must advance students’ abilities to use, manage, and examine the impact of digital tools, digital information and digital operations as they relate to Digital Citizenship. Digital Citizenship encompasses areas such as: analyzing the appropriateness of online resources, impact of technology in a professional setting, ethical and responsible use of digital tools, Internet and digital safety, and management of one’s professional and personal digital footprint.

*(NOTE: Any class meeting the general education requirement must meet these 2 primary requirements and at least 2 of the remaining 4.)*
3. advance students’ ability to use current digital tools (e.g. software, hardware, technological infrastructure) while preparing them to stay current in the advances and changing landscape of digital tools.

4. advance students’ understanding, and mastery of digital tools, information, and resources as applied to general or discipline specific research, project management, project development or evaluation.

5. advance students’ ability to use, apply, and evaluate the impact of digital tools, digital operations, digital information and/or technological infrastructure for communication and collaboration.

6. advance the students’ ability to apply digital tools, digital information, and digital operations in context as it relates to problem solving, decision making, creativity, design and critical thinking.

Members of the Academic Council had asked this to be tightened up. Dr. Chism stated these were the criteria but the group had some misunderstanding of some of the italicized wording [in the original document]. She worked with Dr. Marshall Jones to tidy up the language. Dr. Boyd asked for a summary the changes. Dr. Chism said that the previous requirements were based on technology from the 1990s and were prescriptive in what students need to know. We didn't want to tell students they had to know a specific platform. We wanted the requirements general enough to accommodate changing technology. The group added the idea of appropriate digital citizenship. Dr. Thacker indicated that there were seven criteria, but only two to four have to be met in a course. Dr. Chism responded that they left it open so that it could be discipline specific.

Dr. Meeler asked if there was any guidance for instructors about what should be the primary focus. Dr. Thacker said this should be found in the syllabus. This will get translated into the Gen Ed form by Dr. Gloria Jones.

Dr. Bird commented that one of the recommendations of the Gen Ed Committee was for this to be met in the major. He then asked if it could be rewored to say technology is "a" primary focus rather than (its)"the" primary focus?

Discussion ensued on biology courses currently meeting the technology requirement, but technology is not "the" primary focus. It is "a" focus. Dr. Meeler stated that this brings up whether we want courses to meet the requirement or programs of study to meet the requirement. Dr. Chism indicated that for biology, the technology is more integrated, and developing a new course specifically to meet the technology requirement would be a weird course.

Dr. Bird proposed for the members to think about any course that comes up: it meets the first two criteria and two of the other four. Does it do what we want? Dr. Boyd thinks students will see this as having to take a technology course. She doesn't think this is intended to be complicated. Dr. Thacker stated that he thinks we should allow for flexibility but ensure that more than half a class is related to technology. Dr. Kedrowski said there is motivation to develop courses because they can be used in the major. Dr. Chism said that one thing that is critical is that you don't want everyone to be taking a handful of courses.

Dr. Pretty asked Dr. Harris if she had a strong opinion on this. She said no, so she took over as chair for the remainder of the discussion.
Dr. Pretty said other general education courses, such as physical activity and quantitative, have primary goals. He welcomes the wording to reflect this.

Dr. Meeler indicated that gen ed should be integrated.

Dr. Vorder-Bruegge asked if everything has to be "primary?"
Dr. Pretty stated that there are a number of courses which have more than one primary focus. Dr. Bird indicated that if we are sticklers on something like this, we are producing hurdles for students. Dr. Chism pointed out that if we make it more prescriptive, then the Gen Ed Committee will have to figure out whether it is or isn’t. Dr. Pretty stated he has seen this happen.

Dr. Thacker said he is swayed by decision to move to "a" primary focus. Dr. Meeler moved that we changed "its" to "a". There was further discussion.

Dr. Bird said there will be a form the committee will have to look at to determine the criteria. Dr. Boyd stated this comes to a level of confidence in our committee. Faculty who teach technology courses can weigh in on this. Are we contemplating the ability of transfer students to show competence or mastery? Dr. Pretty said there is not always going to be a technology person on the committee. Dr. Boyd said they can always ask.

The motion carried with one nay.

Dr. Thacker made a motion that we change "class" to "class or group of classes." Dr. Pretty asked for a friendly amendment to change that throughout the preamble and criteria. Dr. Doman was concerned that this would cause a watering down of the requirement. Dr. Meeler asked if we would need to change the requirement to zero-seven to accommodate groups of courses. Dr. Thacker indicated no, that we only have to put the minimum.

Dr. Vorder Bruegge said maybe we should table this until we can get the wording right. Dr. Thacker stated that this is unique in that technology is being encouraged to be met in the major. The oral requirement was mentioned as also being able to be met with a group of courses. Dr. Byrd said this goes back to the flexibility of the program. While these can be met in major, they don’t have to be.

A vote was taken and the motion passed. Dr. Pretty then motioned to change "its" in the preamble to "a." The motion was approved.

Dr. Pretty made another motion to insert "recognizing that programs are encouraged to meet this requirement in the major" in the preamble before the third sentence. The motion was approved.

Dr. Britt commented about the word “digital” being used multiple times. Dr. Bird indicated he believed those were for emphasis. Dr. Thacker moved that we accept the criteria. This motion was also approved.

B. Report from the Working Group on Academic Integrity

In 2013-14, Dr. Belk stated that his group received a charge to look at the Burmeister report from 2003. They came up with an honor code and pledge and sent them to departments in 2014-15, and this is what came back:
HONOR CODE
As a member of the Winthrop community, I will exhibit honesty, integrity, and responsibility in all academic endeavors.

HONOR PLEDGE
I have exhibited honesty, integrity, and responsibility on this assignment, and have neither given nor received unauthorized assistance.

These were well received by the departments. These are back to Academic Council for consideration. Dr. Belk stated that he would like a web presence for this. It would let students know of the process. We haven't had discussion of what goes into that yet.

Dr. Burmeister asked if this would be a tutorial or just informational. Dr. Belk said he had had some conversation with Dean Marlowe about this.

Dr. Burmeister also asked when students would sign this. Dr. Belk indicated this would be on assignments and tests. Dr. Chism inquired if these would be in the Student Handbook?

Dr. Thacker asked if we could vote on the actual code/pledge and come back at a later date to determine how to implement. He then motioned that we support this code and pledge.

Dr. Bird declared this is awesome and a great thing between students and faculty. Dr. Meeler motioned for friendly amendment to add "I" in the honor pledge in the second part of the sentence. Dr. Burmeister indicated a concern about how this is going to be implemented. Dr. Pretty said the charge had to begin somewhere. There will be an Academic Integrity Implementation working group. Mr. Druke mentioned that from a practical standpoint, this honor pledge and code could not be voted on at Faculty Conference until there is discussion and an implementation plan.

The motion was approved.

Revised honors Pledge:

HONOR PLEDGE
I have exhibited honesty, integrity, and responsibility on this assignment, and I have neither given nor received unauthorized assistance.

Dr. Pretty suggested a subcommittee for implementation of the honor code/pledge. He asked Mr. MeKetty who agreed, and Dr. Burmeister volunteered. Dr. Doman and Dr. Abernathy volunteered also.

VII. New Business
A. General Education Working Groups on the Social Science Requirement and on the Writing in General Education Courses Requirement
Dr. Pretty met with [Sociology/Anthropology department chair] Jon Marx on this.
VIII. Announcements—none

IX. Adjournment

Adjourned at 3:53 PM

Respectfully Submitted,

Gina Jones, Secretary

Winston University
Committee on Undergraduate Curriculum
Minutes

The Committee on Undergraduate Curriculum met at 2:00pm on Friday, November 13th in the West Center Computer Lab. In attendance were committee members William Thacker, Clifton Calloway, Malayka Klimchak, Kristen Wonderlich, Kelly Costner, Tim Drueke, Gina Jones and secretary, Jackie K. Brockington, Jr.

4 Program Change Items (Degree) recommended and forwarded to Academic Council for action:

*A request to modify and correct the current justification will be sent back to the college. If received prior to the next Academic Council Meeting, CUC Chair will bring these items up for discussion at that level. [See document immediately following—DP]*
The following 2 items were approved at the College Assembly Level and require no further action at the CUC Level. However, CUC Members noticed that the current Corequisites for this course includes EDCO 306 which will no longer be offered. CUC Chair will communicate these concerns directly with the College. A change in the Corequisites of a course must be approved at the CUC level.

Date: Friday November 13

RE: Actions at November 13, 2015 CUC meeting

As well as the curricular actions we approved, there were some concerns that we placed on hold to give departments time to clarify and/or modify. It is our hope that appropriate actions can be taken in time to address them at the November 20 Academic Council meeting.

The courses and issues are:

<table>

| ECED 350: Teaching Mathematics in Early Childhood Education | The proposed changes remove all the MATH prerequisites. The committee was concerned about students taking this course without any math course. We understand that one of the goals of this modification was to make it more flexible and accessible to students (keeping in line with the new general education goals). We suggest the department consider some middle ground like a prerequisite of “Any general education MATH course”.
| ELEM 360: Teaching Mathematics in the Elementary School | Same as above |
| ECED 351: Teaching Science in Early Childhood Education | The same as above, but with removing the science prerequisites. We suggest changing the prerequisite to something like “any general education science course” |
| ELEM 361: Teaching Science in the Elementary School | Same as above |
| DCED 342: Field Experience in Dance | Proposed change does not remove the coreq. of EDCO 306 which is no longer in the teacher education program. This was discussed when the program was being changed last year and was supposed to be removed. |
| THED 343: Field Experience in Theatre | Same as above |
1) The General Education Committee met on November 6, 2015 and approved the following courses:

Courses: First Certify
Oral:
NUTR 37

Courses: Recertification
Humanities/Arts:
- MUST 306
- THRT 385
- THRT 386
- PHIL 315
- PHIL 301
- PHIL 303
- PHIL 302
- PHIL 390
- RELG 390
- RELG 314
- RELG 313
- RELG 317

Historical:
- MUST 305
- THRT 385
- THRT 386
- PHIL 301
- PHIL 302
- RELG 313
- RELG 314
- RELG 320

Global:
- MUST 307
- MCOM 302
- RELG 300
- RELG 335
- RELG 340
- GEOG 308
- GEOG 305

Technology:

Oral:
- SPED 391/EDUC 401

Social Science:
- LGST 300

2) The following courses were approved for recertification on the condition that they add ULCs to the syllabus, or that the ULCs on the syllabus match the ULCs submitted on the application:

Humanities/Arts: PHIL 315
Global: RELG 335, RELG 340
Social Science: LGST 300

The following courses were approved for initial certification on the condition that they add ULCs to the syllabus, or that the ULCs on the syllabus match the ULCs submitted on the application:

Humanities/Arts: PHIL 340, PHIL 370

3) Additional information was requested for the recertification of BIOL 300/480 for the technology requirement.

4) Our next meeting is February 5 at 1:00 in Withers 205. Applications are due to the committee by January 29.
Policy for Accelerated Graduate Programs (Combined and “4 + 1”) Proposal

Approved by ALC and Provost Boyd on August 31, 2015
Approved by Graduate Council October 30, 2015

Context:
Currently, the Graduate Catalog states, “Winthrop seniors with an overall grade-point average at Winthrop of 3.0 or better may be permitted to take courses numbered 500-599 for graduate credit during their final semester of undergraduate work, provided the total course load (undergraduate and graduate) for that semester does not exceed 16 semester hours. The student may receive graduate credit for these courses only if the requirements for the baccalaureate degree are satisfactorily completed by the end of that same semester.”

In addition, graduate hours taken during the senior’s final semester may not be “double-counted” toward both the undergraduate and graduate degrees.

Given the evolution of accelerated programs, however, a number of schools across the country have created “combined” or “4+1” programs that allow undergraduate students to take graduate-level courses earlier in their undergraduate program of study, and, moreover, those students may count a limited number of those hours for both the undergraduate and graduate degrees.

Proposal:
Students enrolled in or intending to enroll in approved combined or 4+1 programs be eligible to enroll and pursue graduate work in specific 500-level courses, within the prescribed program of study, earlier in their undergraduate program. In addition, students may “double-count” and apply up to 9 hours of graduate level coursework toward both their undergraduate and graduate degrees.

Proposed Institutional Policies

Accelerated Programs
Winthrop offers a select number of “accelerated” programs that allow students to earn both an undergraduate and graduate degree in an accelerated time frame. For example, a student in an “accelerated” program may be able to complete both degrees within five years and take a slightly-reduced number of credit hours. Students should consult current undergraduate and graduate catalogs for more information regarding which programs are currently offered. When offered, these programs fall into one of the following categories:

4 + 1 Programs of Study
4 + 1 programs are institutionally-approved and highly-structured programs of study that allow students to earn both an undergraduate and graduate degree in five years (4 years as an undergraduate; 1 as a graduate). In these programs, a student will take specific upper-level undergraduate courses that 1) satisfy his or her undergraduate degree requirements and 2) prepare him or her to enroll in the required graduate courses immediately after completing his or her undergraduate degree and complete the graduate degree requirements in the prescribed efficient manner. A student in a 4+1 program will typically not take graduate courses for
graduate credit until he or she completes his or her undergraduate degree and is fully enrolled as a graduate student. To pursue a 4+1 program, a student must complete the Intent to Pursue Combined or 4 +1 Degree Program of Study form and be approved by the program director to pursue that specific program. Completion of the Intent to Pursue Combined or 4 +1 Degree Program form and of undergraduate review processes is not a guarantee of admission to the Graduate School.

**Combined Programs**

Combined programs are institutionally-approved and highly-structured programs of study that allow students to earn both an undergraduate and graduate degree in five years. In these programs, a student will take specific graduate-level courses for graduate credit while still enrolled as an undergraduate student, thus reducing the number of graduate courses required for the graduate degree after completing his or undergraduate degree.

To pursue a combined program, a student must complete the “Intent to Pursue Combined or 4 +1 Degree Program of Study” form and be approved by the program director to pursue that specific program. Completion of the Intent to Pursue Combined or 4 +1 Degree Program form and of undergraduate review processes is not a guarantee of admission to the Graduate School.

**Proposed Catalog Language**

**Combined and “4 +1” Programs of Study**

Combined and “4 +1” programs are specialized and coordinated programs of study allowing students to complete their undergraduate and graduate degrees in 5 years for a specific program of study. Consult undergraduate and graduate catalogs for a list of approved combined and 4+1 programs.

An undergraduate student pursuing a combined or 4+1 program may take graduate coursework (500-level only) for the program while still an undergraduate student. Undergraduate students intending to pursue a combined or “4+1” program must submit an Intent to Pursue Combined or 4 +1 Degree Program form to signal intent and must complete program specific review processes no later than the fall of their senior year. Such processes are program specific, and students should contact the graduate director or program director as early as possible during their undergraduate curriculum to ensure they have adequate time to meet all review expectations and are eligible to enroll in graduate work as required by the program of study.

**Full Admission to Graduate School**

In order to be fully admitted to the Graduate School, students must meet all graduate program admission requirements as described in the graduate catalog. Students pursuing a combined or “4 +1” program will not be fully admitted to the graduate school until all undergraduate degree requirements are met for his or her respective undergraduate degree. Completion of the Intent to Pursue Combined or 4 +1 Degree Program form and undergraduate review processes is not a guarantee of admission to the Graduate School.

**Maximum of 9 Credit Hours May Be Used for both Undergraduate and Graduate Degrees**

Students enrolled in an identified combined or “4 +1” program are permitted to use up to 9 credits of 500-level coursework to fulfill both undergraduate and graduate degree requirements.
Eligible coursework is determined by the program and indicated in the program of study. For courses to be applied to both programs, students must

1) have successfully completed 75 credit hours before taking each graduate course;
2) have successfully completed the program specific review process for undergraduates;
3) complete graduate-level coursework in each 500-level courses; and
4) earn a grade of B or better. Courses in which the student earns a B- or lower will not be counted towards the student’s graduate degree requirements.

Awarding of Degrees in Combined and 4 + 1 Programs
Students pursuing combined or 4+1 programs will receive their undergraduate degree within one semester after completing all undergraduate requirements and at least one semester before the graduate degree is awarded. The time allowable between undergraduate and graduate degrees may vary by program. Students should consult the graduate catalog and contact the graduate school for specific admission requirements.
