

Connect TechSmith Relay to your Winthrop Account

Overview

This tutorial will cover how to connect TechSmith Relay to your Winthrop email account. You'll only need to make this connection one time.

Step 1

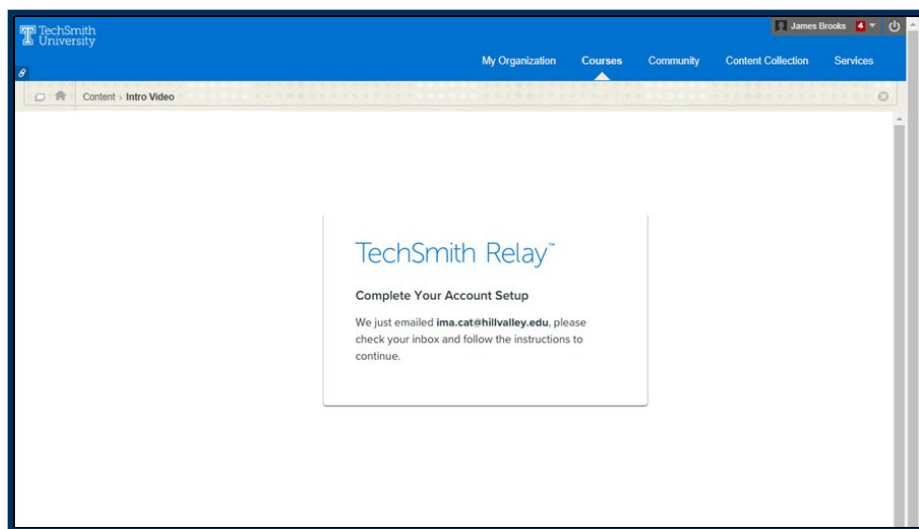

When accessing a TechSmith Relay video in Blackboard, a prompt will appear asking for your school email. Enter your username (i.e., doe2) in the text field and select @mailbox.winthrop.edu from the drop down menu. Click Connect.

The screenshot shows a web browser window with the TechSmith University logo in the top left. The top navigation bar is blue with links: My Organization, Courses, Community, Content Collection, and Services. Below this, a breadcrumb trail shows 'Content > Intro Video'. The main content area has a white background with the 'TechSmith Relay' logo. Below the logo, it says 'Connect Relay with Your School Account' and 'Relay needs to verify your email address in order to keep your information secure.' There is a form with two fields: 'Enter Your School Email' with the text 'ima.cat' and a dropdown menu showing '@hillvalley.edu'. A blue 'Connect' button is below the form. At the bottom, a small link says 'Contact your administrator if you have any questions.'

Step 2

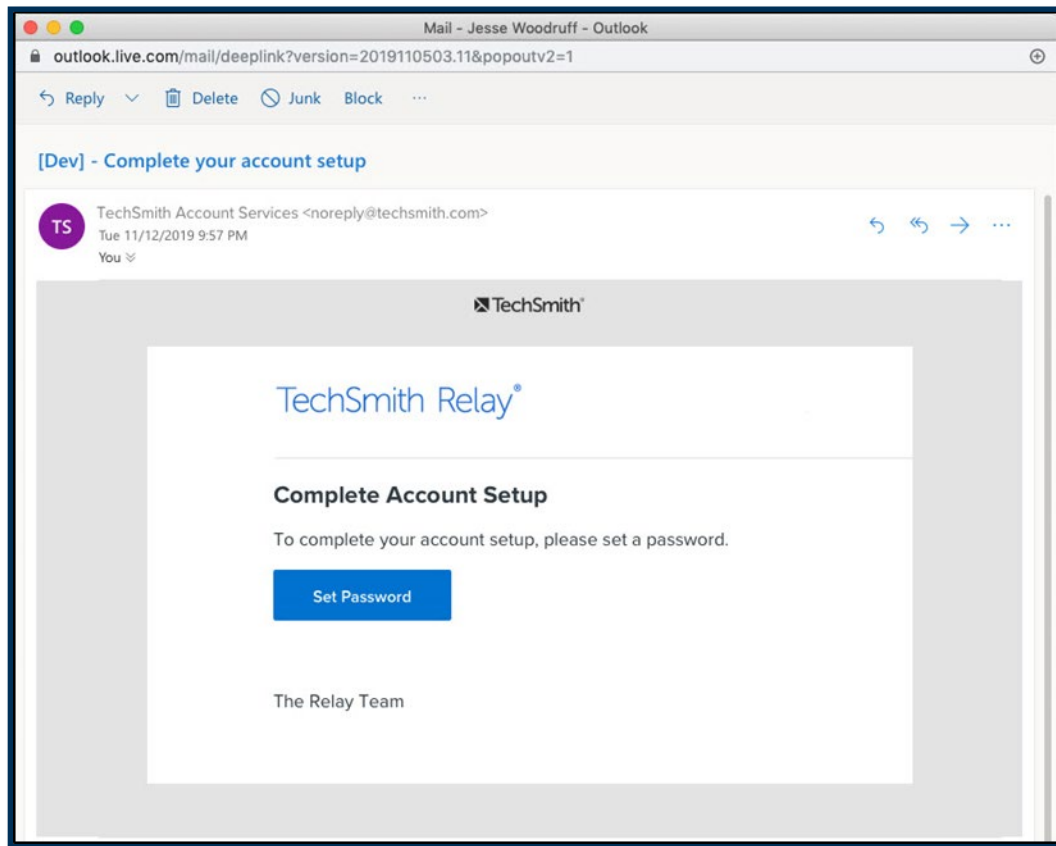

You will be emailed account setup/password reset instructions.

The screenshot shows the same web browser window as in Step 1. The main content area now displays a message box with the 'TechSmith Relay' logo. Below the logo, it says 'Complete Your Account Setup' and 'We just emailed ima.cat@hillvalley.edu, please check your inbox and follow the instructions to continue.'

Step 3

Open the email and click through to reset your password.

Note: You may need to create an account if you do not have one already. In this case, you'd be setting the password instead of resetting, but the process is the same

Step 4

After you set or reset your password, you are done. You can go back to Blackboard and continue to watch the original video.
