

Path to Undergraduate Research Experiences: Biology

Research Continuum

	Introduction to research skills and experiences	Beginning research experiences	Advanced research experiences
Curricular opportunities at Winthrop	BIOL 202, 203	BIOL 300	BIOL 471/472 (Research) BIOL 450H (Honors thesis) BIOL 463 (Internship)
Co-curricular opportunities at Winthrop	-Attend SOURCE -Volunteer in a lab you are interested in	-WISE Internship -Research Seminars in BIOL and CHEM -Gain experience in a lab by partnering with an experienced student	-McNair Scholars Program -INBRE research -Research Council Grant
Off campus opportunities	Volunteer in a lab in a research center	Gain experience in a lab by partnering with an experienced student at a research center	Apply for a Research Experience for Undergraduates (REU) at a research university

As undergraduate research is labor and time intensive, participation in certain programs may be limited. Students interested in participating in formal research experiences are encouraged to take ownership of their own development as scholars, and to take advantage of all of the resources available to them.

If you are interested in getting involved in undergraduate research in Biology please contact the Professor whose work you are interested in and discuss the available opportunities in their lab.

See <http://www.winthrop.edu/undergradresearch/> for more information about Undergraduate Research at Winthrop University.
